

Page 1 of 9 · The Bouncing Postbag

Biscuit-Bouncer wakes with his tail thumping like a parade drum. He has 9 invitations for homes beside the meadow and 6 for homes beyond the creek. “Easy!” he barks. “I will sprint the short road and be back before breakfast.”

Page 2 of 9 · A Line Missing from the Map

At the forest gate, Ginger-Deer studies the map in silence. The bright red route is 35 metres, but a pencilled path to the creek homes adds another 27 metres. Biscuit nearly races on without noticing her raised hoof.

Page 3 of 9 · The Quiet Creek Lane

They follow the missing line and find a lane tucked behind silver reeds. Of the 24 letters in Biscuit’s full postbag, 9 are now safe in little painted mailboxes. “Good spotting,” Biscuit tells Ginger. Her shy smile is brighter than the morning mist.

Page 4 of 9 · Two Teams, One Promise

The creek path forks around a muddy hill. Ginger suggests two delivery teams, each carrying 8 invitations. Biscuit wants to dash ahead, but he remembers how easily the quiet lane vanished from his map. This time, he listens.

Page 5 of 9 · The Ribbon Bridge

A loose plank blocks the next crossing. Ginger has a 75-centimetre ribbon and Biscuit finds another 25 centimetres in his satchel. Tied together, the ribbon can mark a safe one-metre boundary while they repair the plank.

Page 6 of 9 · Three Ways Through the Ferns

Beyond the bridge are three fern paths. One is 18 metres, one is 25 metres, and one is 22 metres. Biscuit sniffs each trail while Ginger checks that the shortest one still reaches the final cottage.

Page 7 of 9 · Ribbons for the Wagons

At the parade field, five little wagons wait without decorations. The friends have 40 ribbons and decide that every wagon should look equally splendid. Ginger ties careful bows while Biscuit holds the fluttering ends.

Page 8 of 9 · Every Friend Arrives

The first drum rolls. Seventeen children gather beside 8 grown-ups, including every family from the hidden creek lane. Biscuit’s legs are muddy and his breakfast is long gone, but his grin could fill the whole field.

Page 9 of 9 · The Best Kind of Fast

There are 30 seats beside the bandstand and 26 are filled when the music begins. Biscuit saves the last few for tired travellers. “Fast is useful,” he says, “but noticing people is how we all arrive together.” Ginger-Deer finally takes the proud first step at the head of the parade.

Questions for Biscuit-Bouncer and the Parcel Parade

Read the story together first. Use one question at each page, then the question at the end. Answers are below the dotted line: fold them under or cover them while reading.

Page 1 · The Bouncing Postbag

How many invitations must Biscuit-Bouncer deliver altogether?

Choices: 13 · 14 · 15 · 16

Page 2 · A Line Missing from the Map

How long is the complete route in metres?

Choices: 52 · 60 · 62 · 72

Page 3 · The Quiet Creek Lane

How many letters are still in the postbag?

Choices: 13 · 14 · 15 · 16

Page 4 · Two Teams, One Promise

How many invitations can the two equal teams carry?

Choices: 14 · 16 · 18 · 20

Page 5 · The Ribbon Bridge

How many centimetres of ribbon do they have altogether?

Choices: 90 · 95 · 100 · 110

Page 6 · Three Ways Through the Ferns

How many metres long is the shortest path?

Choices: 17 · 18 · 22 · 25

Page 7 · Ribbons for the Wagons

If 40 ribbons are shared equally across 5 wagons, how many go on each wagon?

Choices: 5 · 7 · 8 · 10

Page 8 · Every Friend Arrives

How many friends are gathered for the parade?

Choices: 23 · 24 · 25 · 26

Page 9 · The Best Kind of Fast

How many seats are still empty?

Choices: 3 · 4 · 5 · 6

Answers (fold under before reading)

Page 1: 15. Make 10 by moving 1 from the 6: 9 + 1 + 5 = 15.

Page 2: 62. Add tens and ones: 30 + 20 = 50 and 5 + 7 = 12. Then 50 + 12 = 62.

Page 3: 15. Subtract 9 from 24. Take away 10 to get 14, then add 1 back to get 15.

Page 4: 16. Two equal groups of 8 make 8 + 8 = 16.

Page 5: 100. 75 + 25 completes the next hundred: 75 + 20 = 95, then 5 more = 100.

Page 6: 18. Compare the tens first. Eighteen has 1 ten, while 22 and 25 each have 2 tens, so 18 is shortest.

Page 7: 8. Five equal groups of 8 make 40, so 40 shared by 5 equals 8.

Page 8: 25. Add 17 + 8 by making 20: 17 + 3 = 20, with 5 left. Then 20 + 5 = 25.

Page 9: 4. Count up from 26 to 30: 27, 28, 29, 30. That is 4 steps.
