

Page 1 of 6 · The Picnic Board

Corgi sets a ten-frame picnic board beneath the apple tree. A gust flips the cloth and scatters the treats into the grass. Ted-E-Bear holds the corners while Corgi checks the spaces in the first row.

Page 2 of 6 · Buns in the First Row

Corgi finds a small group of berry buns beside the basket and places one bun in each space from the left. Ted-E-Bear points to the filled spaces so they can see the group without counting the empty ones.

Page 3 of 6 · Which Tray Has More?

Ted-E-Bear returns with four apple slices while Corgi carries six corn cakes. They arrange both groups on matching frames. The picnic guests need the fuller tray first, so the friends compare the spaces side by side.

Page 4 of 6 · The Odd Picnic Frame

The friends line up the picnic frames, but one shape does not match the others. Its spaces run in a different direction and make the group harder to read. Corgi pauses before touching anything so Ted can spot the muddled frame.

Page 5 of 6 · Spaces Still Empty

Seven treats are ready on the picnic board, but some spaces are still empty. Ted-E-Bear brings a bowl of honey buttons. Corgi must count the open spaces to choose exactly enough buttons to complete the frame.

Page 6 of 6 · Ready to Share

The guests arrive as Corgi fills the final open space. Every treat now sits in two tidy rows, making the whole group easy to see. Ted-E-Bear carries the completed frame to the blanket for one final count.

Questions for Corgi-on-the-Cob’s Ten-Frame Picnic

Read the story together first. Use one question at each page, then the question at the end. Answers are below the dotted line: fold them under or cover them while reading.

Page 1 · The Picnic Board

How many spaces are in one row?

Choices: 4 · 5 · 6

Page 2 · Buns in the First Row

How many berry buns are in the frame?

Choices: 2 · 3 · 5

Page 3 · Which Tray Has More?

Which tray has more treats?

Choices: 4 treats · 6 treats · They match

Page 4 · The Odd Picnic Frame

Which frame does not match the others?

Choices: The sideways frame · The full frame · The empty frame

Page 5 · Spaces Still Empty

How many more treats make ten?

Choices: 2 · 3 · 4

Page 6 · Ready to Share

Count the complete ten-frame.

Choices: 8 · 10 · 12

After reading

Why is a ten-frame easy to count?

Answers (fold under before reading)

Page 1: 5. Five spaces make one complete row.

Page 2: 3. Three buns sit together in the first row.

Page 3: 6 treats. Six is more than four.

Page 4: The sideways frame. The sideways frame was the odd one out.

Page 5: 3. Seven and three make ten.

Page 6: 10. Two rows of five make ten.

After reading: Its spaces sit in two rows of five, so you can see how many treats there are, and how many more make ten, without counting one by one.
